Counterexample to Euler's Conjecture for Seventh Power

Arij Zulfi Mufassaroh & Adib Rifqi Setiawan

A direct computer search yielded:

$$127^7 + 258^7 + 266^7 + 413^7 + 430^7 + 439^7 + 525^7 = 568^7$$

as the counterexample to a conjecture proposed by Leonhard Euler in 1679 that at least n n th powers are required to sum to an n th power, $n > 2$ (Singh, 2017, p. 213; Nahin, 2011, p. 350).
